## Repeat rules examples

## Example 1

| 1st attempt | MATH 54, 4 units | grade $=\mathrm{F}$ |
| :--- | :--- | :--- |
|  |  |  |
| 2nd attempt | MATH 54, 4 units | grade $=\mathrm{B}$ |

In this sequence, the student succeeded in improving the grade received after the 1 st attempt. The passing grade in the 2 nd attempt will void the F and the 1 st attempt will not be counted in the GPA (term or cumulative) or for units. The passing grade in the 2nd attempt will be counted in the GPA (term or cumulative).

## Example 2

| 1st attempt | MATH 54, 4 units | grade =D |
| :--- | :--- | :--- |
|  |  |  |
| 2nd attempt | MATH 54, 4 units | grade =B |

In this sequence, the GPA earned with the D will not be calculated in the term and cumulative GPA because the course was retaken and a better grade was received. The passing grade in the 2 nd attempt will be counted in the GPA (term or cumulative).

## Example 3

| 1st attempt | MATH 54, 4 units | grade $=\mathrm{D}$ |
| :--- | :--- | :--- |
|  |  |  |
| 2nd attempt | MATH 54, 4 units | grade= F |

In this sequence, the GPA earned with the D will not be calculated in the term and cumulative GPA because the course was retaken. The F grade in the 2 nd attempt will be counted in the GPA (term or cumulative) and 4 units will be earned from the D grade in the first attempt.

## Example 4

| 1st attempt | MATH 54, 4 units | grade $=\mathrm{F}$ |
| :--- | :--- | :--- |
|  |  |  |
| 2nd attempt | MATH 54, 4 units | grade $=\mathrm{D}$ |
| 3rd attempt | MATH 54, 4 units | grade $=\mathrm{B}$ |

In this sequence, the student's transcript will include units and GPA based on the D in the 2 nd attempt. The grade of $F$ received in the 1st attempt will not be counted in the term and cumulative GPA. The B earned in Spring 2020 will satisfy requirements and will be counted in the APR but it will not be counted in the term or cumulative GPA.

## Example 5

| 1st attempt | CHEM 3A, 3 units | grade $=\mathrm{D}-$ |
| :--- | :--- | :--- |
|  |  |  |
| 2nd attempt | CHEM 3A, 3 units | grade $=\mathrm{F}$ |
| 3rd attempt | CHEM 3A, 3 units | grade $=\mathrm{B}$ |

In this sequence, the F of the 2nd attempt will count towards the term and cumulative GPA even after the B grade is earned in the 3rd attempt. The student will earn 3 units from the 1st attempt towards the cumulative total. The B satisfies the curricular requirement.

## Example 6

| 1st attempt | SPANISH 25, 3 units | grade $=$ NP |
| :--- | :--- | :--- |
|  |  |  |
| 2nd attempt | SPANISH 25, 3 units | grade $=$ B |

In this sequence, the student earns 3 units and GPA from the 2nd attempt.

## Example 7

| 1st attempt | CHEM 3A, 3 units | grade $=\mathrm{F}$ |
| :--- | :--- | :--- |
|  |  |  |
| 2nd attempt | CHEM 3A, 3 units | grade $=\mathrm{F}$ |
| 3rd attempt | CHEM 3A, 3 units | grade $=\mathrm{B}$ |

In this sequence, only the $F$ from the 2 nd attempt is calculated in the term and cumulative GPA. When the grade of $B$ is received in the 3rd attempt, the student will earn 3 units towards the cumulative total.
